R156,700.00

About the Course: 2024

Qualification Fee: **R174 700** includes training fee and kit (compulsory products). **Only for qualified Skin Therapists with 3 years' experience.**

Different modules in the course:

Plasma treatment:

This is a highly effective and non-invasive lifting treatment with extraordinary results completely without surgery. The latest technology in permanent make-up and skin tightening from LCN. A multi-functional beauty unit.

Soft Plasma:

It is an alternative solution to surgery. Highly effective cosmetic anti-ageing treatment, perfectly suitable for larger areas in your face and décolleté. Special applicators are used to generate micro currents. These micro currents penetrate deep into the skin to stimulate collagen and tighten skin fibres.

Scalp Pigmentation:

Men and women are suffering from hair loss. The LCN Scalp Pigmentation method helps give an optically thicker and fuller looking head of hair. This gives an ideal solution for thin and sparse hair. With the LCN Scalp Pigmentation method you will tap into a new target group for your salon and increase your turnover dramatically.

Micro Needling:

The Micro Needling Treatment will complement the Plasma treatments for optimal skin stimulation. Micro needling stimulates collagen and elastin as well as tightening the skin. The special attachment of 20 very fine stainless needles is suitable to treat and reduce scar tissue, stretch marks and wrinkles.

Course Content

Plasma Treatment:

1. Theory
2. The LCN Plasma treatment
3. Implementation of Plasma treatments

Soft Plasma:

1. Theory & where to incorporate the soft plasma.
2. Skin Analysis
3. Instruction on how to use the soft plasma applicators

Scalp Pigmentation:

1. Scalp Pigmentation by embedding colour into the scalp
2. Implementing the use of a special attachment consisting of 20 fine needles
3. How to choose the correct colour for a client
4. Colour knowledge and mixing options

Micro Needling:

1. Skin analysis for choosing the correct length of your needle
2. Working on different skin types to give the client the result she expects
3. Using different serums or ampoules desired by the skin

Overall:

1. Dermatology
2. Hygiene
3. Contraindications
4. Workstation
5. Treatment and preparation
6. Sales & Aftercare
7. Marketing
